Scooter Servicing and Maintenance

Overview:

This one day course will offer an overview on the Invacare's Scooter range. There will be a presentation on how faults are displayed and ways in which to rectify them. Participants will have the opportunity to view and use the PC Wizard software along with HHP's for Scooters. The course will also look at testing of the motors, batteries and charger and identifying good test points. A workshop session will be included focusing on products and fault finding on test rigs with the use of multi-meters.

Course Content:

- Review of the Scooter range
- Fault finding
- Electronic spare parts catalogue
